

## Full Stack Developer

DAALAB is a leading data science company at the forefront of innovation, dedicated to transforming data into actionable insights. We are seeking a dynamic and skilled Senior or Expert Full Stack Developer to join our talented team.

We are proud about our flexible, dedicated, and collaborative culture within our teams. You will enjoy working with us if you are ready to experience fast changes, creative solutions and meaningful problem solving.

### Key Responsibilities:

- Design, develop, and maintain scalable and efficient full-stack applications that seamlessly integrate with our data science solutions.
- Collaborate closely with data scientists to bridge the gap between data analytics and user interfaces, ensuring a cohesive and intuitive end-user experience.
- Take ownership of the development lifecycle, from concept to deployment, and contribute to the evolution of our cutting-edge products.
- Implement and optimize web applications for maximum speed and scalability.
- Troubleshoot, debug, and enhance existing software to improve functionality and performance.
- Actively introduce industry trends and emerging technologies, bringing fresh ideas and best practices to the team.
- Work collaboratively within our development environment, participating in sprint planning, code reviews, and daily stand-ups.
- Utilize your expertise in Software as a Service (SaaS) to enhance and streamline our development processes.
- Proactively identify and address potential challenges, ensuring the reliability and security of our applications.
- Help build the foundations of our technology stream for sustainable business services.

### Skills and Qualifications:

- Valuable real-life experience in full stack development with a focus on data-driven applications. Bachelor's Degree in Computer Science or related field may be a plus.
- Experience in some of the following front-end technologies such as HTML, CSS, JavaScript, and modern JavaScript frameworks (e.g., React, Angular, or Vue.js).
- Strong back-end development skills using languages like Python, Node.js, or Java.
- Experience with database systems (SQL, NoSQL) and data modeling.
- Familiarity with cloud platforms (AWS, Azure, or GCP) and containerization technologies (Docker, Kubernetes).
- Ability to collaborate effectively with cross-functional teams, including data scientists, designers, and product managers.
- Excellent problem-solving and analytical skills with a keen attention to detail.
- Self-starter with a proactive mindset and the ability to thrive in a fast-paced environment.

- Strong communication skills, both written and verbal in Hungarian and English

If you are a motivated Full Stack Developer with a passion for connecting data science with user interfaces, and you are ready to contribute your SaaS expertise to a dynamic team, we invite you to apply and be a key player in shaping the future of data-driven solutions at DAALAB.

We work in a hybrid setup, and meet 2 times a week in the office (Budapest, 3rd district). If you are working remotely, let us know and we can come up with a fitting solution.
